WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

KONKOVICHI MRBM COMPLEX, USSR
FIXED FIELD SITES

Launch Area No 1 (TDI name: Petrikov MRBM Launch Site) -- Type I 52-10-30N 26-34-30E

25X1A

Launch Area No 2 (TDI name: Konkovich MRBM Launch Site) -- Type I 52-15-30N 28-37-45E

25X1A

Konkovichi Fixed Field MRBM Site No 1 (TDI name: Novoselki SSM Fixed Field Position No 1) 52-23-00N 28-12-15E

25X1A

Konkovichi Fixed Field MRBM Site No 2 (TDI name: Novoselki SSM Fixed Field Position No 2) 52-25-45N 28-11-00E

This report supplements NPIC/R-67/64, 1/ which discusses the Konkovich MRBM Complex, previously consisting of two Type I launch areas, together with a rail-to-road transfer point.

25X1D

Konkovichi MRBM Launch Areas No 1 and 2 (Figure 1) were first observed in

25X1D

The construction status could not be determined at that time because of the limiting conditions of the photography. The next coverage of the sites occurred in

25X1D

and they were considered to be complete. They are approximately 12 nautical miles (nm) south-southwest of the fixed field sites and connected to them by road. A road also connects the fixed field sites. A rail-to-road transfer point is located between and probably serves the two soft sites. It could also serve the two fixed field sites, since it is connected to them by road.

KONKOVICHI FIXED FIELD MRBM SITE NO 1

Fixed Field Site No 1 (Figure 2) is located in a gently rolling wooded area. It is approximately 3 nm south-southeast of Fixed Field Site No 2 and 6.5 nm east-southeast of Novoselki.

25X1D

It was not visible on photography of

25X1D

however, by

25X1D

four elongated padlike clearings were visible. The clearings are arranged in an L-shaped pattern and are oriented on an

azimuth of approximately 30 degrees, which approximates the azimuths of the soft sites. A faint road pattern connecting the clearings is discernible through the dense tree cover. West of the padlike clearings are two additional clearings, one of which is formed by a road intersection. There are two unidentified objects located next to this intersection. Another unidentified object is located next to the northern padlike clearing.

KONKOVICHI FIXED FIELD MRBM SITE NO 2

Fixed Field Site No 2 (Figure 3) is located in a gently rolling wooded area. It is approximately 3 nm north-northwest of Fixed Field Site No 1 and 5.5 nm east-northeast of Novoselki.

It was not visible on photography of

25X1D

however, by

25X1D

four roughly elongated padlike clearings were visible. The clearings are interconnected by a faint road pattern which is barely discernible through the dense tree cover. They are oriented on an azimuth of approximately 35 degrees.

25X1D

Two additional clearings are visible in the immediate area. One of these clearings contained three possible personnel tents and the other contained two possible ready tent foundations when seen on photography.
